

REMARKS

The amendment to the specification hereinabove introduces no new matter, and is provided to correct grammatical inconsistencies/errors.

The amendments to the pending claims provide more consistency to the claims and simplify them as well since in most cases the amended independent claims recite a fewer number of different types of wireless location techniques for combining.

Five previously pending independent claims have been cancelled (i.e., Claims 131, 133, 134, 163, and 169), and respectively replaced with five new independent claims (i.e., Claims 454, 461, 468, 484, and 502). To be clearer, the following table shows the correspondence between the cancelled independent claims and the new independent claims. For each row of the table, the claims in the row correspond.

Cancelled Independent Claims	New Independent Claims
131	454
133	461
134	468
163	484
169	502

In general, the new independent claims are somewhat broader than those cancelled. However, each of the new claims is believed to recite patentable subject that has been previously similarly claimed in the present application.

Accordingly, since all claims are believed to be in condition for allowance, it is requested that the present application be reconsidered. It is believed that no fees are due with the current Preliminary Amendment as indicated in the introduction to this amendment since there are the same number of independent claims, and there are 15 *fewer* total claims. If any other fees are due, the undersigned Applicant requests a phone call at 303-863-2975.

Date: December 7, 2008

Respectfully submitted,

By: /Dennis J. Dupray/
